

PENINSULA

**Peninsula Group Sustainability  
and Environment Statement**

March 2025

## Purpose

This Sustainability and Environment Statement (the “**Policy**”) aims to successfully develop the corporate vision of the Peninsula Group (“**Peninsula**”) for Energy Consumption and Greenhouse Gases (“**GHG**”), to optimise the energy consumption and reduce GHG emissions in Peninsula’s business by committing to continuous technical and operational improvement. This Policy also aims to ensure that current regulatory requirements are integrated into Peninsula’s business decisions and plans.

## Peninsula’s Commitments

- To inform, train, and raise awareness among Peninsula’s employees about improving energy efficiency and the importance of reducing GHG emissions, strengthening the mechanisms for consultation and participation of Peninsula’s employees, investing resources in the generation and dissemination of knowledge, and reporting on the Peninsula’s performance.
- Establish the necessary measures to control energy consumption and emissions to comply with current IMO and EU regulations.
- Set ambitious objectives and targets in the areas of decarbonisation and the environment through monitoring, analysis, and reporting of results, taking necessary measures to achieve them.
- Continuous assessment focussing on how Peninsula can improve its GHG footprint and carbon intensity indicator (“**CI**”) in the course of its regular bunkering activity.
- Gradually introduce the use of alternative fuels with lower emissions as and when such fuels become available.
- Increase Peninsula’s sales of alternative fuels, contributing to its customers’ emissions reductions.
- Continually adopt all necessary preventive measures to avoid excessive emission of GHG, and to develop methods to minimise and avoid impacts on ecosystems in which Peninsula operates.
- To promote sustainable and effective management systems through the planning of review, analysis, correction, and continuous improvement activities.
- Promote transparency by regularly reporting on matters of energy consumption and GHG issues.

Peninsula is committed to continuous improvement in environmental and sustainability practices. Peninsula regularly reviews and updates its Sustainability and Environment statement, incorporating feedback and changes in regulations. Changes to the Sustainability and Environment statement will be communicated to all employees and stakeholders.

Thank you for your commitment to Peninsula and for helping to maintain the highest standard of sustainability and environmental protection possible.

---
